## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 4-8 and 11-27 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

The prior art made of record teaches various methods to generate outphased signals but does not teach the claimed configuration:

As to claim 4, the prior art made of record does not teach an outphasing modulator comprising multiplying a first and second phase shifted signal by a respective first and second amplitude modulation signal with a first and second scaling factor and generating outphased modulated signals from the first and second phase shifted modulated signals.

As to claim 8, the prior art made of record does not teach setting a scaling factor once per command to set an average output power of output signals of a power amplifier, said output signals generated by amplifying outphased modulated signals by said power amplifier and said outphased modulated signals generated from said phase shifted modulated signals.

As to claims 17, 21 and 24, the prior art made of record does not teach an outphasing modulator comprising a multiplier to multiply an amplitude modulation signal by a phase modulated carrier signal to generate a modulated signal and a phase splitter coupled to the multiplier to generate phase shifted modulated signals.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure includes: Kolanek (US 6,633,200) and Gu (US 6,737,914).
